

Community groups busy in July

Volunteers parked an average 1,176 cars per market day in July. This is the highest average for a full month since ECCO commenced operations in mid-December. It is an average of 177 more cars per day than was recorded for July 2008. This is good news confirmed by market and town traders who report good crowds through July.

Volunteer car parking attendants from Eumundi Tennis Club provide a friendly welcome to market visitors. ECCO donates a total of \$540 each market car parking day to the community organisations represented by the volunteers, based on \$15 per hour of service for six people for six hours. The total contribution to community groups will form part of the audited financial report for ECCO being prepared now for the public record for the year ended 30 June 09.
